

Learning Spaces around the world:

global trends, challenges
and outcomes

This seminar will present and discuss the results of an on-going international comparative study (Europe, Japan, Singapore, Australia, USA, Canada) of formal and informal Learning Spaces (Active Learning Classrooms, Learning Centers, Learning Commons), through their different dimensions: institutional policies, design principles, technological inputs, outcomes on teaching and learning practices, and more globally on campuses' transformation. The presentation will highlight the biggest trends and the best practices observed, as well as the challenges yet to be overcome for the Learning Spaces, in an international approach.

Time

October 11, 2018 16:30-18:00
